

## Bluewave Energy

Bluewave is a national delivery business selling diesel fuel, gasoline, heating oil, propane and related products to businesses, industries and home owners across Canada. As part of the Parkland Fuel Corporation's family of brands, Bluewave Energy is Canada's largest Shell distributor of bulk fuels and high quality lubricants.

Our commitment to excellent customer service, product availability and on-site delivery has made us an industry leader with 57 locations across Canada. This enables us to quickly respond to the needs of local markets and unique customer requirements.

## Convenient Commercial Cardlocks

All Bluewave cardlocks are accessible 24 hours a day, seven days a week. They feature diesel, both marked and clear, and gas products all with state-of-the-art self-serve dispensers that are easy to use and save time. Bluewave cardlocks are built specifically for larger commercial vehicles and are easy to access with an extensive network across Canada. Your billing is handled automatically; simply swipe your card and fill up!

## Our Mission

To establish lasting customer relationships by always asking "what more can we do for you?"

## Superior Customer Service

**Petroleum delivery specialists** - this is our only business so our focus, expertise, systems and customer support are designed to solve all of your petroleum requirements – commercial fuels, lubricants and equipment and services.

**Flexibility and customization** - as an independent company specializing in petroleum delivery, we have the flexibility to customize our offer to meet your needs in the areas of supply, pricing, delivery/transportation and storage.

**Localized service and supply** - our decentralized customer service network, with branches across Canada means we can better respond to your needs.

**Account management** - a dedicated team of account representatives, with access to many resources including Shell lubricant specialists, manages your business requirements and is available for on-site consultation.

**Local operations** - by directly employing local staff and owning the trucks and facilities, Bluewave is able to directly manage the operations to provide a higher level of quality control than a third party model, such as an agency.

## Supply Security

**Multiple sources of supply** - Bluewave has contractual arrangements with several refiners to enable greater flexibility and control over supply.

**Storage capacity** - Bluewave Energy stores bulk fuel in several strategic locations throughout western Canada. Bluewave is also able to access industry loading facilities at all major centres.

## Extensive Delivery Network

**National presence** - a delivery network across Canada with 57 branch locations and supply arrangements in all provinces except Newfoundland.

**Extensive fleet** - Our fleet provides extensive coverage and the ability to increase capacity on short notice for large account requirements.

## Shell Branded Lubricants

**Experience** - the largest distributor of Shell lubricants in Canada and provides experienced technical support for all lubrication related issues.

**Expertise** - has a dedicated lubricants team to maximize our effectiveness.

**Full product line** - bulk and packaged lubricants, storage tanks and pumps are all available.

**BLUEWAVE ENERGY Western Regional Office**  
3115 12 Street NE, Suite 140, Calgary, AB, T2E 7J2

## Fuel Quality

**Quality standards** - Fuel supplied by Bluewave meets strict quality standards as required by CGSB specifications designed for low temperature operating conditions. Quality control and assurance are aligned to ASTM testing criteria.

**Low temperature** - Bluewave's fuels meet low temperature needs in both cloud and pour, and fulfill requirements of the northern communities in the Northwest Territories.
